Amrut Savadatti

Software engineer, MS CS May 2026. 4+ years shipping real products. I care about quality and clear ownership.

Worcester, Massachusetts, United States

Summary

Hi, I'm Amrut Savadatti. I'm finishing my MS in Computer Science in May 2026. I have a little over three years of industry experience. I like turning messy problems into simple, reliable software. I write clean, testable code, document what matters, and follow through. I enjoy stepping up to lead when it helps the team move faster. I'm looking for a place where I can own problems end to end and be judged on results.

Experience

Worcester Polytechnic Institute

1 year 7 months

Full-stack Developer

September 2025 - Present (6 months)

Worcester, Massachusetts, United States

I'm working on revamping the Beecology web application which is a citizen science platform that helps users identify bees and plants and contribute data to support biodiversity research. The project involves modernizing an older Angular + Flask build by rebuilding the frontend in React, fixing and extending the Flask/PostgreSQL backend, and restoring full functionality for data upload, visualization, and analysis.

AI Automation Engineer at MME

May 2025 - August 2025 (4 months)

Worcester, Massachusetts, United States

1. Designing an end-to-end judge-participant outreach platform in n8n, automating 800+ personalized emails for WPI's MME URPS and cutting manual coordination time by 70%.
2. Integrated Qualtrics survey data with Microsoft 365 and Slack via webhooks to log responses, trigger follow-ups, and push real-time status notifications to the events team.

3. Building a live analytics dashboard (participants, judge commitments, completion rates) with n8n cron jobs, enabling data-driven decisions on event day

Learning Assistant

September 2024 - May 2025 (9 months)

Worcester, Massachusetts, United States

Graduate Coordinator

August 2024 - March 2025 (8 months)

Worcester, Massachusetts, United States

1. Collaborated with faculty to provide actionable feedback from a student perspective to enhance course design and delivery.
2. Facilitated adoption of inclusive and effective teaching practices by sharing insights and promoting services offered by the Morgan Learning and Teaching Center.
3. Contributed to the continuous improvement of academic experiences through structured observation, feedback sessions, and resource recommendations.

ClosetMate

AI and Software Engineer

June 2025 - December 2025 (7 months)

1. Designing and developing the backend architecture for ClosetMate's innovative swipe shopping fashion app, integrating AI try-on technology.
2. Implementing a secure payment gateway Stripe to enhance user trust and streamline transactions.
3. Collaborated with cross-functional teams to ensure seamless integration of e-commerce functionalities, improving user experience.

Media.net

2 years 10 months

Web Application Developer

January 2022 - May 2024 (2 years 5 months)

Mumbai, Maharashtra, India

1. Built scalable backend systems using Java, Kafka, and Docker to support ad tech infrastructure across 400+ websites.

2. Developed real-time APIs, centralized authentication, and data processing pipelines that improved latency, security, and cost efficiency.

3. Led initiatives in system automation, API proxying, and infrastructure optimization, contributing to major product scalability and reliability gains.

Associate Web Application Developer

August 2021 - January 2022 (6 months)

Mumbai, Maharashtra, India

Bhaktivedanta Hospital & Research Institute

2 months

SDE

December 2019 - January 2020 (2 months)

Mumbai, Maharashtra, India

Full Stack Android App Development

Created the Official in-House Delivery Android App for BhaktiVedanta Hospital and Research Institute

<https://github.com/AgnellusX1/BVH-PharmacyApp>

Data Analyst

December 2019 - January 2020 (2 months)

Mumbai, Maharashtra, India

Performed Data Analysis and Visualization using Tableau and Google Data Studio

ValueFin India Credit Services Private Limited

Frontend Web Developer

June 2019 - July 2019 (2 months)

Mumbai, Maharashtra, India

Contributed in developing the company's Blog website.

Maintained company websites and blogs.

Education

Worcester Polytechnic Institute

Master of Science - MS, Computer Science · (August 2024 - August 2026)

University of Mumbai

Bachelor of Engineering - BE, Computer Engineering · (2017 - 2021)
